Moscow

Dimensioni
445 sqm.

Cronologia
2007

Status
idea

An imposing block of skyscrapers on the outskirts of Moscow, a real city within the city surrounded by a huge condominium park completed with every luxury. A luxurious residential area of Moscow with large green spaces. We have been contacted to develop an interior proposal for one of the most prestigious apartments.

A penthouse still under construction. Which is spread over several floors, composed of large winter gardens and big windows.

The proposal starts from scratch, keeping only the external shell intact.
