In the outskirts of Florence, in the middle of the surrounding buildings, a small corner made to measure. Surrounded by greenery, where you can enjoy outdoor life and prepare dinners with friends.

A transformation made with a minimal language. A few elements, a monoblock with a large sink all covered in resin to wash the vegetables from the garden and roll out the pizza dough. A bamboo mat as a sunshade and a single surface to accommodate barbecue and pizza oven. The custom designed copper tap fabricated by a local craftsman.
